

Kitchen Garden Program

In Design & Technology, the students at Two Rocks Primary School have weekly access to the kitchen and garden. Students from Year 3 to Year 6 are responsible for maintaining their garden beds and planting seedlings. In 2023, we will begin to compost our crunch & sip waste using the new 'Subpod' system.

The produce planted is used in weekly cooking activities. With a new recipe to cook each fortnight, the students learn a range of kitchen skills and read a variety of recipes. The Pre-Primary to Year 2 students have access to the school's Bush Tucker Garden, which has allowed them to learn about Indigenous plants and foods.
