

Pre Primary

Teachers: Mrs Regts, Mrs Joubert & Miss Hawk

Education Assistant: Mrs Maurice, Mrs Troy & Mrs Mettamano

Hello and Welcome to Pre Primary!

We are so excited to have started our Pre-Primary Programmes with a bang! We are settling in well to the new classroom rules and rotations. Our focus is how to be a good friend and how to express our emotions, which we learn about from the Health Protective Behaviours Program.

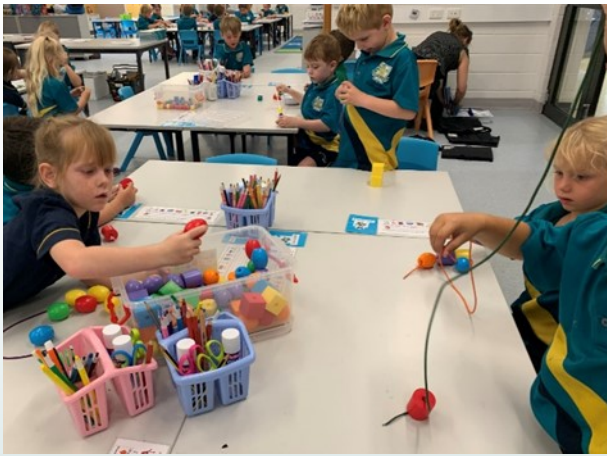

We are learning the 43 letters and sounds of the Literacy Soundwaves Program, to support our reading and writing. We practice every day how to form our letters correctly and are making wonderful progress.

This year we are learning how to read and write our Sight Words from our Fitzroy Books. These sight words will help us with our reading at school and at home, where we have already begun counting our Reading Nights challenge.

We enjoy applying hands on learning experiences to further support our understanding of numbers from the Stepping Stones Maths program. Using manipulatives to further develop our ideas is great fun! We also enjoy fine motor activities to strengthen our fingers and hands. We are cutting, threading small beads and making items in our Design and Technology class.

Science is an exciting endeavour as we explore the world around us and classify what is living and non-living. Going outside on scavenger hunts is a fun part of our lessons. We are investigating our beans and will soon be able to plant them and observe them grow.

We have many specialist teachers helping us learn and grow. We have begun our weekly Sport, Mandarin, Music and Art lessons which have been very exciting!

Over the year we will be learning and applying our school's values of Getting Along, Organisation, Resilience, Persistence and Confidence through the You Can Do It! Program. We will be able to use these values in personal and academic development, and to remind us that we can do anything as long as we keep trying! Perseverance conquers!
